Password Strength Evaluation Report

Objective

To understand password strength and evaluate security using online tools.

Tool Used

Password Tester

Methodology

Multiple passwords with different complexity levels were tested using an online password strength checker.

Password	Strength	Score
password123	Weak	~30%
Ravi2024	Medium	~50%
Ravi@2024!	Strong	~70%
Cyber@Intern#2026	Very Strong	~90%
BlueTiger!Runs@Night2026	Excellent	~100%

Results

Increasing password length and complexity improved security rating significantly.

Password Attacks

Brute Force Attack

Attacker tries every possible password combination automatically.

Dictionary Attack

Uses common words list to guess passwords quickly

Best Practices

- Use long passphrases.
- Combine letters, numbers and symbols.

- Avoid predictable passwords.
- Enable MFA authentication.

Conclusion

Strong passwords significantly reduce risk of unauthorized access.
